2021 International GeoInformatics Summer School (Online)

Wuhan University

August 23 - August 31, 2021
Wuhan, China

Call for Participation

International GeoInformatics Summer School offers motivated university students and graduates an international and strongly academic summer session where outstanding lecturers and young talents meet to explore new ideas. 2021 International GeoInformatics Summer School (Online) will be organized on **August 23rd-31st** with courses covering fundamental concepts, methodologies, and technologies in Multi-temporal SAR Interferometry for Disaster Mitigation, Machine Learning & Social Sensing, Geospatial Big Data Computing and Disaster Management.

The Organizing Committee reviews individual candidates for qualification and relevance and then extends the formal invitations which will detail the summer school program.

Organizer

State Key Lab of Information Engineering in Surveying, Mapping and Remote

Sensing (Wuhan University)

Co-Organizers

Hi-Target Satellite Navigation Technology Co., Ltd.

Joint International Research Laboratory of GeoInformatics (JIRLG)
